

Personal Information

Name: **Dr. David Pierre Leibovitz**

Address: Institute of Cognitive Science
Room 2201, Dunton Tower, Carleton University
1125 Colonel By Drive
Ottawa, Ontario, Canada K1S 5B6

Phone: 613-322-6215 (Mobile)

Fax: 613-520-3985 (Office)

Email: dpleibovitz@ieee.org

WWW: dpleibovitz.upwize.com

ORCID: 0000-0001-7251-8528

ResearcherId: K-7312-2012

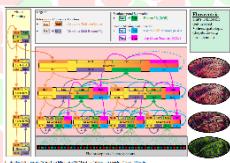

Scopus Author ID: 6507396839

Canadian Citizen

Education

2013

Ph.D. in Cognitive Science, Carleton University

Thesis: "*A Unified Cognitive Model of Visual Filling-In Based on an Emergent Network Architecture*" [doi: 10.13140/RG.2.1.2681.6482]

Supervisor: Robert L. West

1985

BSc. in Computer Engineering, University of Alberta

Awards and Honours

2004-2009

Carleton Scholarship, \$5000/yr, Institutional, Academic

1981

Alexander Rutherford Scholarship, \$1500, Provincial, Academic

Research Interests

Sensory-motor coupling; Multisensory integration; Visual perception under motion; Unified Cognitive Modelling & Architectures; Emergence; Process Epistemology, Metaphysics & Philosophy

Research Accomplishments

- Unified cognitive model of visual processing under motion

- Detailed cognitive model of human retina
- Emergent Network architecture for modelling under massive recurrence
- Emergent Cognitive System for situating models
- Wiki to sociologize unification

Publications

Books

Leibovitz, D. P. (forthcoming) *A tale of two epistemologies: How feedback leads to scientism and how it can be harnessed to rescue science*. [working title].

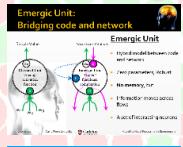

Smith, D. G. W., & **Leibovitz, D. P.** (1987) *MinIdent - A Data Base for Minerals and a FORTRAN 77 Program for Their Identification - A Reference Manual*. Department of Geology, University of Alberta, Edmonton, Alberta, Canada. [doi: 10.13140/RG.2.1.1815.9841]

Smith, D. G. W., & **Leibovitz, D. P.** (1986) *MinIdent User's Manual. A FORTRAN 77 program for mineral identification*. Computing Services, University of Alberta, Edmonton, Alberta, Canada. [doi: 10.13140/RG.2.1.2733.4882]

Research Experiences & Lines of Inquiry

2003 – present

Emergic Cognitive Model

Carleton University, Ottawa, Ontario

Continuously progressing and unifying a single situated and embodied cognitive model for the entirety of cognition, starting with a cognitive agent having a visual system that moves and interacts with a dynamic environment. Emergic modeling incorporates the remainder of cognition according to the principles of the Emergic Approach.

2003 – present

Emergic
EA
Approach

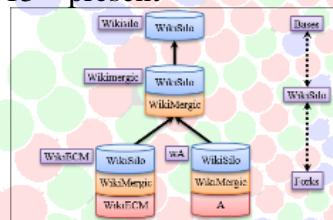

Emergic Approach to Unified Cognitive Modeling

Carleton University, Ottawa, Ontario

Developed a unified epistemology, ontology & metaphysics for the analysis, decomposition, synthesis and modeling of complex systems. Validated the *empirical philosophizing* by developing a unified cognitive model. Writing a book on the two epistemologies.

2013 – present

WikiSilo

Carleton University, Ottawa, Ontario

WikiSilo theory is a minimalist epistemology that supports a unifying discipline within academia. It is supported by the WikiSilo tool (from wikisilo.org), and Wikimergic is its first client.

2013 – present

Emergic
EA
Approach
Wikimergic
The Free WikiSilo
Unifying the Science of
Brain and Mind

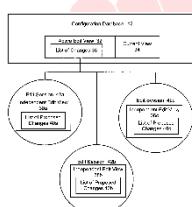

Wikimergic

Carleton University, Ottawa, Ontario

Wikimergic is derived from the Emergic Approach to unified cognitive modeling. As a product, it forms a wiki and tool that can be used for unifying analysis and synthesis. More importantly, it can demonstrate a coherence of complex distributed conceptions. As a research line of inquiry, one asks how to make the most effective tool for the sociologizing of unification.

1988 – 2002

Hierarchical Control of Complex Adaptive Communicative Systems

Nortel, Ottawa, Ontario.

Architected human-computer interaction software based on a hierarchical knowledge representation for a complex adaptive real-time communication system.

1987 – 1988

Domain Expert System for Generating Legal Documentation

Legalware, Toronto, Ontario.

Designed expert legal documentation production software based on template representations

Research Experiences & Lines of Inquiry (continued)

1981 – 1987

Domain Expert System in Mineral Identification

University of Alberta & Micronex. Edmonton Alberta.

Architected a mineral database & identification software using fuzzy logic & statistical techniques.

Teaching Interests

Cognitive Science, Computational Modeling, Process Philosophy & Metaphysics, History & Philosophy of Science, Philosophy of Mind

Teaching Experiences

2009 – present

Invited Lecturer (Carleton)

Lectured specific sections of various courses related to cognitive science.

2007 – 2009

Teaching Assistant for various courses (Carleton)

Lectured specific sections of various courses – cognition, linguistics, philosophy, psychology (word length effect) & metaphysics.

2008

Tutored a Paul Menton Centre student with disabilities (Carleton)

2004 – 2005

Teaching Assistant for the Writing Tutorial Service (Carleton)

Tutored students one-on-one and customized and led workshops for entire classes on improving all aspects of writing.

1988 – 2002

Customer and Designer Training of Systems and Processes (Nortel)

Created training material and taught numerous courses on system software and associated processes for use by external customers and internal designers. Mentored and supervised the training of numerous individuals..

Other Professional Experiences

1988 – 2002

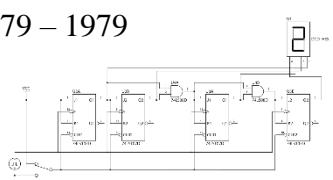

Designer, Manager & Architect of Embedded Real-Time Software

Nortel, Ottawa, Ontario.

Architected human-computer interaction software based on a hierarchical knowledge representation for a complex adaptive real-time communication system.

1979 – 1979

Hardware Circuit Designer, EPROM Programmer

Ultratech Systems Ltd. Edmonton Alberta.
